

St Barnabas CE Primary Science Vision and Principles

Our Science vision is to create a teaching and learning environment that nurtures children's natural curiosity, by enabling children to ask questions about their world around them and helps them to understand its purpose in the real world. At St Barnabas we look to inspire children to become scientists of the future.

At St Barnabas, we think Science is going well when...

All children are engaged and challenged.

Children ask questions.

Children find links to their real world.

Children are working scientifically, thinking and speaking like scientists.

Children are building on their prior learning.

Teachers' subject knowledge is good.

Practical resources are used when necessary.
