

# ST BARNABAS CLIMATE VISION

Our Science Ambassadors, worked with all the children across the school to develop a climate vision and what we want our Nature Park to be. To help us develop this, we wrote a poem about things in our world which we find negative and turned them into positive ideas and actions. Below, is our vision for our future.

Our Nature Park will be a place where we feel welcomed and can relax. We will feel safe, thankful and hopeful in our Nature Park. Our vision is a Nature Park where butterflies, birds, plants and insects thrive. Our Nature Park will demonstrate our commitment to our world, where we let our light shine.

Butterflies

Birds

Flowers
